

Cat Stairs

Paper Sculpture: Folding

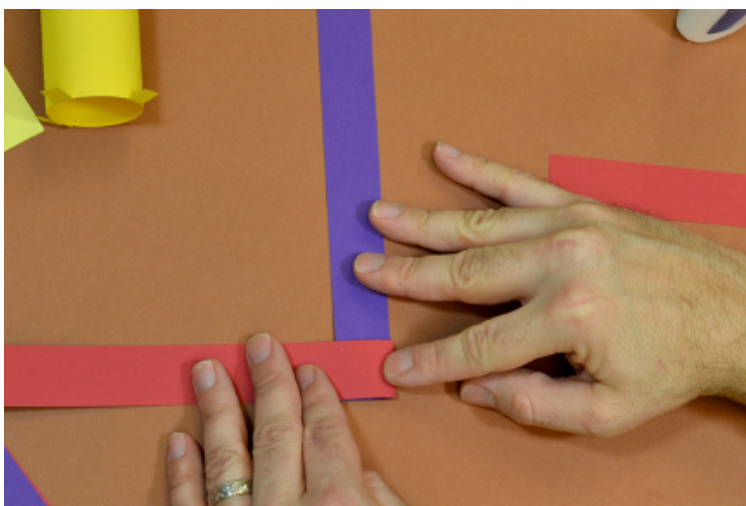

1. Glue Two Strips

Put a little glue on the end of one strip. Be careful the glue doesn't ooze out.

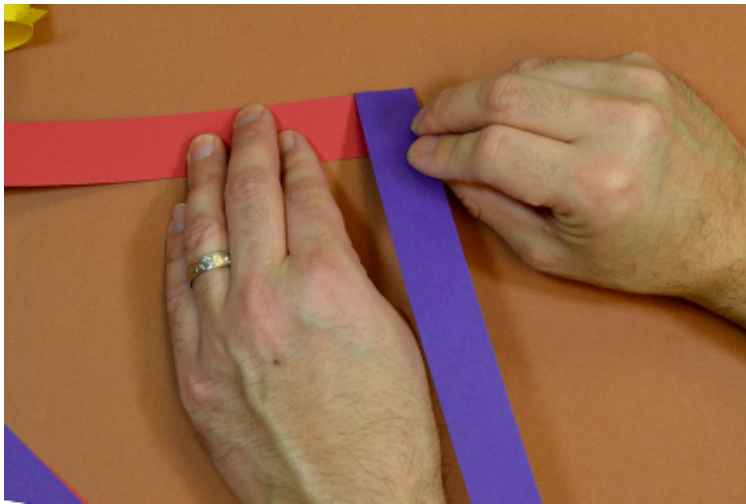

2. Perpendicular Strips

Place the other strip on top of the glued one so that they are perpendicular - so that they make an "L".

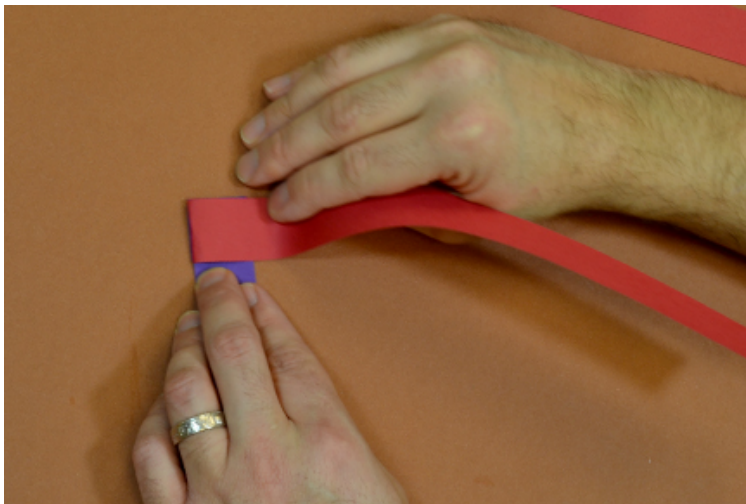

3. Bottom Over Top

Fold the strip that is on the bottom (red) over the strip on top (purple). Make certain that the fold of the red lines up with the edge of the purple strip.

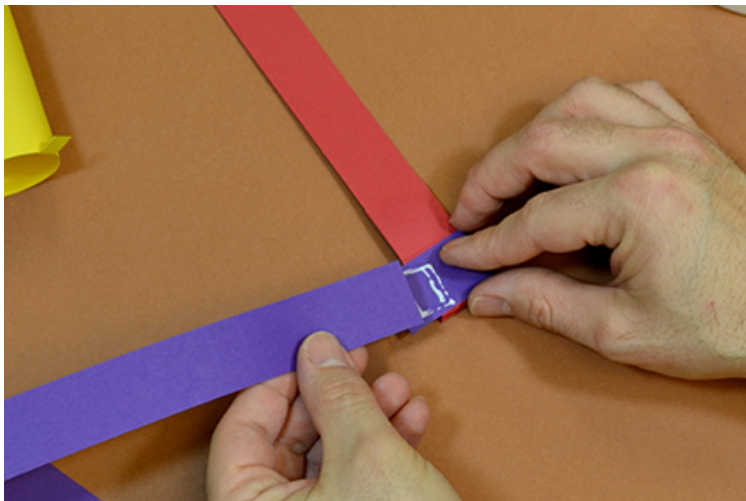

4. Bottom Over Top

Fold the strip that is on the bottom (purple) over the strip on top (red). Make certain that the fold of the purple lines up with edge of the red.

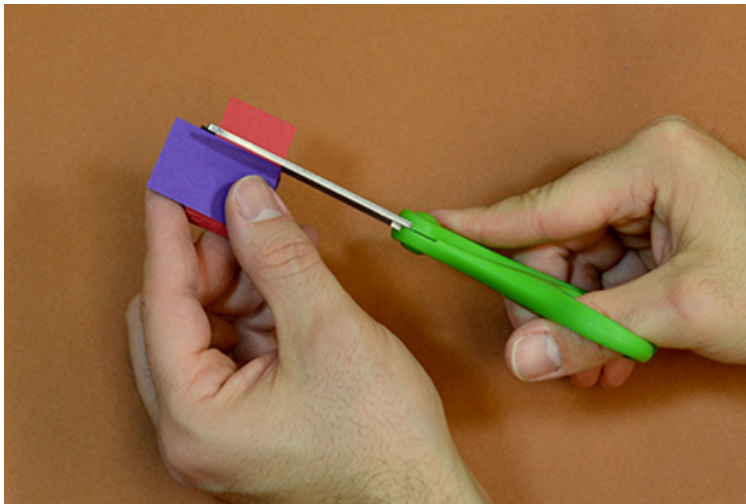

5. Repeat

Repeat this pattern until you near the end. Red over purple, purple over red, red over purple, purple over red.

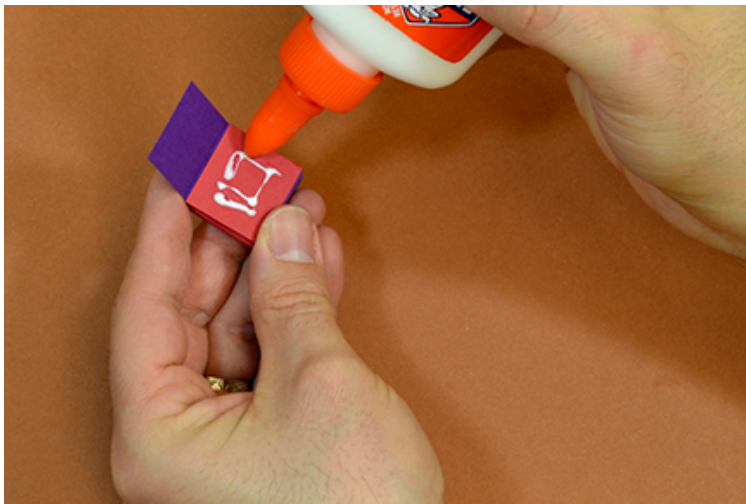

6. Add More Strips (optional)

Once at the end, you can then add more strips to make a longer cat stairs. In this example, red has been added already. Purple is being glued on.

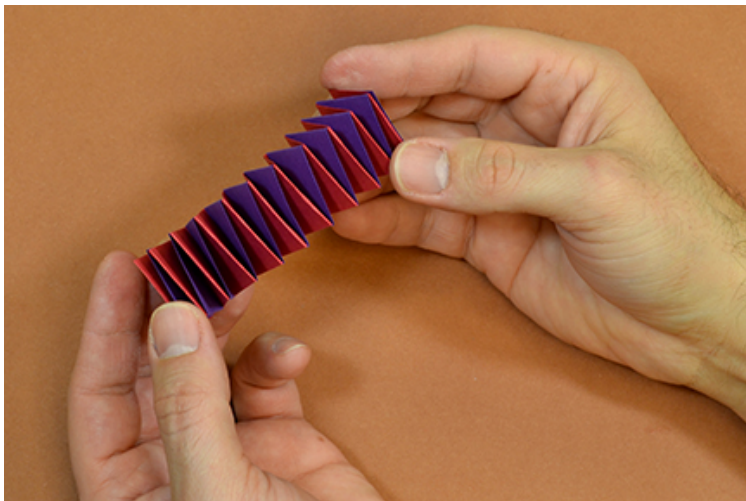

7. Trim the Ends

When you reach the end, trim the excess from each strip.

8. Glue

Glue the ends together.

9. The Finished Cat Stairs
